Notice of Change of Business Segment Structure Companies

We hereby announce the following changes to the structure of companies under each business segment effective April 1, 2025, as announced on May 14, 2024 in the “Announcement of Business Segment Reorganization and Medium-Term Management Plan”.

Details are as follows.

【Reasons for the Change of Companies in Segment】

To respond to market changes and reorganize the group based on business compatibility, we have changed the segment structure companies to enhance synergy among the companies within the segment

(Semiconductor and Mechatronics Related Business)

Amid expected drastic changes in the industry environment, we have established a four-company structure with high compatibility to quickly respond to market information, identify and develop growth markets, and advance the integration and commercialization of our technologies.

(Medical and Healthcare related Business)

By developing overseas markets and utilizing characteristics that are not influenced by market trends, we have established a three-company segment structure, adding one new company, to steadily advance our business plans.

(Environment and Social Infrastructure Related Business)

To maximize synergy effects and develop products that meet the needs of customers in the domestic power, new energy, and EC logistics industries, we are establishing a six-company structure.
